

*Are you really
an “Advanced”
Designer?*

Prove it!

You or your yearbook adviser have signed you up for the Advanced Design Track (ADT) at Jostens Yearbook Central this August.

Last year when we taught this class, about half the students felt the that the curriculum was too easy and the other half felt it was too advanced. So this year we are asking that you complete a ten question test and do a quick assignment so we can properly place you in the correct class.

We fully realize that you should not be in a beginning level class so we are going to divide up those who signed up for advanced into an advanced class and an intermediate class based on the results of this test.

If you don't complete the test and assignment, you will automatically be placed in the intermediate class.

You can begin the survey by going to www.jostenswashington.com and clicking the Advanced Design Test link on the home page.

If you have any questions about the test, the class or the workshop please e-mail us at info@koobraey.com or call 800-755-5662.
