

**Are you bringing
your own laptop?
Then read this!**

Read this completely!

Our records indicate that you (or your adviser) have told us you are bringing your own (or your school's) laptop to the workshop. If this is not the case, immediately call us at 800-755-5662 or e-mail us at info@koobraey.com.

Please note that you may only bring laptops. Due to power requirements of desktop computers we cannot use them at PLU. If you bring a desktop computer you will not be able to use it.

If you are bringing your own laptop it is important that it is completely ready for you to work on your yearbook when you arrive. **There will be no time for us to help you install software!**

If you use YearTech Online to create your yearbook, you need a web browser with version 9 of Flash installed. You can download this for FREE. To make sure you have this installed, just go to your YearTech Online site and work with the Page Designer. If you can design pages, you are good to go! If you don't have it installed, please call Jostens Tech Support at 800-328-2435 and they will help you install it.

If you create your yearbook with InDesign, you must have InDesign installed on your laptop. You can install whatever version of InDesign you use at your school or you may download the 30-day trial version from the Adobe website at http://www.adobe.com/downloads/?ogn=EN_US-gntray_dl_trialdownloads.

Please do not install the trial version prior to July 2, as it is only usable for 30 days from the day you install it and we don't want it to expire while you are at the workshop.

You must also have YearTech for 2009 installed. If this has not been received at your school yet, please call us at 800-755-5662 and we will get a copy sent right out. Please make sure that once you have installed it, you open it and create one DPS so that your school name and job number have been entered and you know that it is installed correctly. If you need assistance with installation of YearTech, please call the Jostens Tech support line at 800-328-2435.
